

Sávio Fialho | Product Engineer

[Email](#) ▪ [GitHub](#) ▪ [LinkedIn](#) ▪ Lisbon, Portugal

Product Engineer building consumer financial products across frontend architecture, platform integrations, and blockchain infrastructure, with a focus on turning complex systems into intuitive user experiences.

Selected Impact

- **7+ years** shipping consumer financial products across banking, fintech, and blockchain.
- **End-to-end product ownership**, from early concepts and UX through frontend architecture, provider integrations, deployment, and production delivery.
- **Proven scale:** 100,000+ gas-sponsored transactions, 700+ paymaster deployments, and thousands of cross-chain transfers across 5+ networks.

Experience

Sophon Labs | Product Engineer

November 2024 – Present

- **Built and evolved** smart-account and gasless transaction infrastructure, powering account creation and on-chain actions such as deposits, withdrawals and swaps.
- **Shipped consumer experiences** across onboarding, identity, KYC, cards, vaults, token swaps and rewards, working across frontend, backend integrations and external providers.
- **Built user acquisition and operational tooling end-to-end**, spanning registration and verification flows, application integrations, deployment and internal administration.
- **Proposed and implemented product-led engagement features**, translating early concepts into polished consumer experiences.
- **Supported Sophon's token launch and ecosystem infrastructure**, contributing to portal, cross-chain and block explorer integrations.

txFusion | Frontend Blockchain Developer

September 2023 – October 2024

- **Built and shipped four blockchain products** covering digital asset management, cross-chain transfers, paymaster infrastructure and non-custodial transaction automation using zkSync and Account Abstraction.
- **Collaborated closely with backend and smart contract engineers** to deliver production blockchain integrations across 5+ networks.

Softfinança | Frontend Developer

October 2019 – September 2023

- **Built responsive interfaces and interactive data visualizations** for banking and financial applications, collaborating with design and backend teams to simplify complex user workflows.

Education

- **Web development** — [ETIC - School of Technologies, Innovation, and Creation](#) **2017–2019**
- **Certified Web Designer** — [SENAC - National Commercial Learning Service](#) **2014–2016**
- **Bachelor of Laws** — **Federal University of Rio de Janeiro** **2007–2011**
